API Documentation

- ACC : <https://portal-acpt.api.ehealth.fgov.be/>
- PROD : <https://portal.api.ehealth.fgov.be/>

2. Updated features

2.1. API modifications

2.1.1. Schedule

For last minute booking directly at the center, this method accepts a new flow "LAST_MINUTE_BOOKING_CENTER".

This flow can only be used by the reservation tool.

2.1.2. Create / Invalidate / Search notification(s)

For last minute booking directly at the center, these methods accept a new flow "LAST_MINUTE_BOOKING_CENTER".

This flow can only be used by the reservation tool.

2.1.3. Schedule status

For the last minute booking, this method returns an extra field "zipCode".

2.1.4. Activate by ssin and update / delete electronic contact data

A new source can now use these methods.

For the method "activate by ssin", the field "source" accepts a new value "REGION_ESSENTIAL_WORKER".

For the methods "update electronic contact data" and "delete electronic contact data", the field "contactDataSource" accepts a new value "REGION".

2.2. Business rules modifications

2.2.1. List schedulable vaccinations

The essential workers are added to the algorithm to return people by priority.

The priority algorithm is now :

1. Healthcare workers
2. People older than 70 years
3. 75% people from 65 to 69 years and people with a comorbidity
4. Essential workers
5. People from 18 to 69 years
