# 2. Updated features

## 2.1. Bulk upload for school collectivities

It is now possible to upload a CSV file in order to create multiple prescription for reason high risk contact.

This will not directly create code(s) right away but the system will analyze the covid situation of the patients (vaccination status and contamination in the last 180 days) in order to create 0, 1 or 2 CTPC code(s).

The codes will be visible a few minutes later in the dashboard of the collectivity.

It is possible to download a CSV template.

Beware for excel users:

- Excel removes leading zeroes of the ssin
- Excel removes the “+” of the mobile phone number

The file must provide ALL information for EACH row.

Also, the phone number must be a mobile phone number, not a home phone number.

It is only available for collectivities (not for companies) of type school:
