2. New features

2.1. New rule for High Risk Contact already infected with 1 minor symptom

High risk contacts who are identified in the system as having been infected with covid-19 within the last 180 days should consult their GP at the onset of a minor symptom.

Therefore, in script 2A, 2C, “1A house member” and 2S, in the case of an already infected HRC, Advice 1 will be displayed as soon as a minor symptom is checked instead of Advice 5 which is no longer appropriate.

High Risk Contact – Advice list

2.2. Other changes

- REMOVE completely Q3A in script 2A and Q5 in script 2C. All the info in this question is either redundant or incorrect.
- ADD one word to the *information for Agent* under Q10 in script 2E → “The vaccination may only take place after you receive the negative result of your **LAST** test”
