- PROD : <https://portal.api.ehealth.fgov.be/>

2. Updated features

2.1. Unavailability of collectivities created by the contact center

The contact center can now create new collectivities when necessary.

Those collectivities are NOT available in the collectivity tool as it is NOT the purpose to make them available in the collectivity tool.

2.2. Exception for children under 12

When making an individual prescription for reason high risk contact, it is possible to select to use the exception for children under 12 years old.

Previously, it was only used for the test recommendation mechanism.

It now enforces the type of quarantine certificate to 3 days instead of 10.

2.3. Zip code used for tracing

When a prescription is made, the contact tracing for the patient begins or continues. It is important to know for which region assign the patient.

We know use the zip code of the collectivity/company to assign the region for the tracing.

2.4. Collectivity type: full name

In the search for collectivities, the collectivity type name is now fully shown even when it's long.

Chercher collectivités

Dénomination 	Type d'organisation
Commune	Maisons de soins psychiatriques (MSP)
Date de début	Services de soins palliatifs et continués
	Maisons médicales
	Centres et accompagnement des personnes avec un handicap
	Service de soins intégrés à domicile (SSID)
